Project codenames are used to comply with client NDAs. Full context can be discussed during interviews where permitted.

PROFESSIONAL SUMMARY

Frontend Leader with 6+ years of experience delivering large-scale web and mobile products for Japanese and Vietnamese enterprises across e-commerce, logistics, HR tech, fintech and B2B platforms. Proven record of leading frontend teams within product organisations of up to 45 engineers — mentoring developers, establishing delivery standards, and driving hands-on execution across Angular, Next.js, Vue/Nuxt, React Native and Flutter. Ship real-time, SEO-optimised systems end-to-end from Figma design through architecture, code review and release. Comfortable bridging UI/UX, frontend and mobile concerns within a single ownership scope.

CORE SKILLS

Frameworks	Angular 20+, Next.js 13–16, React, React Native, Vue 3 / Nuxt 2–3, Flutter, Expo
Languages	TypeScript, JavaScript (ES2023), Dart; familiarity with Java, Kotlin, Objective-C, Swift
State & Async	RxJS, Redux, Zustand-style stores, Socket.io, REST, async pipelines
UI / Design	Tailwind CSS 4, HeroUI, Vuetify, Ant Design, Less, Figma (UI/UX design)
Backend / Infra	Node.js, NestJS, Prisma, Supabase, Firebase, Docker; integration with Java Spring Boot & PHP Laravel APIs
Quality & Delivery	Code review, performance optimisation, SEO, mobile build & release (APK/IPA), NFC / QR / native integrations
Leadership	Team leading, mentoring, delivery standards, architecture design, base-source ownership, Japanese client communication

PROFESSIONAL EXPERIENCE

Frontend Leader, [GM Solution](#) — Hanoi, Vietnam

Jul 2022 – Present

Project FRE*** — B2B Agricultural Marketplace

Angular 20 · Tailwind CSS 4 · Socket.io · RxJS · Java Spring Boot APIs | Jun 2025 – Present | Frontend Leader
| 45-person product team

- **Leadership:** Led the frontend sub-team within a 45-person product organisation — owned FE delivery planning, task breakdown, sprint coordination, and alignment with backend, QA and PM.
- **Leadership:** Established code review standards, PR guidelines and component conventions; mentored developers on Angular 20, RxJS and async data-flow patterns.
- Defined the Angular 20 base-source architecture for a multi-tenant marketplace (seller, buyer, admin) serving HoReCa with 10,000+ products and full VAT-invoice compliance.
- Architected real-time chat on Socket.io with RxJS pipelines; built fine-grained RBAC and led SEO optimisation for the e-commerce surface.
- Embedded seller WebView in the partner mobile app for a unified web/mobile UX.

Project CAR*** — Internal Recruitment Platform

Next.js 13+ · Tailwind CSS · HeroUI · Java Spring Boot · Figma | Apr 2025 – May 2025 (2 mo) | Frontend Leader & UI Designer | 8-person team (24 man-months)

- **Leadership:** Sole FE owner in an 8-person squad — drove end-to-end delivery from Figma to release within a 2-month deadline; split tasks, reviewed PRs and unblocked teammates.
- Designed UI in Figma, defined Next.js base architecture and shipped chat and role-based permission modules on schedule.

Project NLJ*** — Automated Road Transport (Japan)

Next.js 13+ · Tailwind CSS · HeroUI · REST API (Java Spring Boot) | Oct 2024 – Mar 2025 (6 mo) | Frontend Leader | 20-person team (120 man-months)

- **Leadership:** Led the FE squad within a 20-person team — sprint planning, task assignment, code review and technical decision-making for a Japanese logistics client.
- **Leadership:** Mentored developers on Next.js/HeroUI patterns; aligned FE scope with backend API contracts and client UX expectations.
- Defined frontend architecture and built dispatching workflow with route management and real-time order tracking.
- Optimised large operational data tables via virtualisation and memoisation.

Project KOT*** — Phase 2 / Mobile App (Workforce Time-Tracking, Japan)

Flutter | May 2024 – Sep 2024 (5 mo) | Mobile Developer | 11-person team (70 man-months)

- Primary mobile engineer on the App phase of a Japanese workforce time-tracking SaaS product.
- Implemented attendance flows (check-in / check-out) and payroll-related logic on Flutter, optimised for the client's reliability and UX standards.

Project PAR*** — HR & Partner Management Platform (Japan)

Next.js 13+ · Figma | Dec 2023 – Apr 2024 (5 mo) | Frontend Leader & UI/UX Designer | 8-person team (88 man-months)

- **Leadership:** Led frontend delivery in an 8-person team while balancing hands-on coding — coordinated FE tasks, tracked progress and conducted code reviews for Japanese enterprise releases.
- **Leadership:** Advised the client on UI/UX patterns for the Japanese market; translated Figma designs into a scalable Next.js component structure the team could extend.
- Built CMS for component, partner and multi-level permission management on Next.js.

Project KOT*** — Phase 1 / Tax & Time-keeping Web (Japan)

Vue 3 · Laravel (PHP) · Inertia.js | Apr 2023 – Nov 2023 (8 mo) | Frontend Developer | 26-person team (120 man-months)

- Developed the employee tax-declaration / time-keeping web for a Japanese workforce time-tracking product line on Vue 3 + Laravel via Inertia.js.
- Contributed across forms, validation, tax-rule UI and time-keeping flows for Japanese end users.

Project TAB*** — Japan Travel Social Network

Nuxt 2 · Vuetify · Firebase · Flutter (companion app) · Laravel + MySQL backend | Jul 2022 – Mar 2023 (9 mo) | Frontend Leader | 13-person team (65 man-months)

- **Leadership:** Led the frontend team within a 13-person project — set code-quality standards, reviewed PRs, guided task breakdown and mentored developers on Nuxt 2/Vuetify.
- **Leadership:** Coordinated with backend and mobile squads on Firebase integration, API contracts and release timelines.
- Implemented core social features — feed, chat, comments and push notifications — with focus on UI performance on Vuetify.

Frontend & Mobile Developer, Luvina Software — Hanoi, Vietnam

May 2020 – Jul 2022

Project PET*** — Pet Care Platform

React.js · Ant Design · Less CSS · Java Spring Boot APIs | Mar 2022 – May 2022 (3 mo) | Frontend Developer | 6-person team (60 man-months)

- Designed and shipped the admin dashboard with a consistent, extensible Ant Design system.

Project NEO*** — Construction Site Management

React Native · Vue.js · PHP · NFC / QR · OpenWeather API | Jun 2021 – Feb 2022 (9 mo) | Frontend & Mobile Developer | 15-person team (300 man-months)

- Solved domain-heavy problems on a 300 man-month construction-site management product: site tree-view diagrams, labour-safety control and access management.
- Reviewed peer code, enforced coding standards and owned the build / release pipeline (APK / IPA).
- Integrated peripheral data sources — NFC, QR codes and the OpenWeather API — into a unified mobile experience.

Project ESR*** — Sales & Marketing System

React Native · React.js · Redux · Firebase · Axios · Java Spring Boot APIs | Sep 2020 – May 2021 (9 mo) | Frontend & Mobile Developer | 40-person team (300 man-months)

- Delivered unified UI across web and mobile from a shared component library on a 40-person, 300 man-month sales & marketing programme.
- Implemented real-time chat and Firebase push-notification systems; managed complex sales-pipeline state with Redux.

Project BEE*** — Healthcare Mobile R&D

Android Native (Java / Kotlin) · Swift · Flutter (research) | May 2020 – Aug 2020 | Mobile R&D | 8-person team (200 man-months)

- Researched native iOS / Android development and Flutter; built experimental modules for a hospital-management product line in the ophthalmology domain.

Frontend Developer (Fresher), VNPT — Hanoi, Vietnam

Jan 2020 – May 2020

- Full-time frontend fresher role focusing on JavaScript, HTML and CSS fundamentals.

FREELANCE

Project GUV* — Home-Cleaning Service Platform** — Frontend & Mobile Developer

May 2021 – Oct 2021

React Native (Mobile App) · React.js · Redux · REST API

- Sole frontend owner of both the consumer mobile app and the operator web platform.
- Built a real-time booking flow, order-status management, map-based geolocation and a service-rating system.
- Tuned performance for smooth experience across iOS, Android and modern browsers.

PERSONAL PROJECT

Project VIVU* — Vietnam Travel Platform** — Self-directed full-stack project

Feb 2026 – Present

Next.js 16 · Prisma · Supabase (Auth & DB) · Expo

- End-to-end full-stack project promoting Vietnamese tourism, exercising the latest Next.js stack with Supabase-based authentication.
- Designed schema, auth flows and a shared codebase across web (Next.js) and mobile (Expo).

EDUCATION

B.Eng. in Electronics & Telecommunications, [Hanoi University of Science and Technology \(HUST\)](#)

Oct 2015 – May 2020

LANGUAGES

- Vietnamese — Native
- English — Professional working proficiency (technical reading & writing; conversational)
